TECHNICAL PROJECTS

Comic Pow Wow, *Developer*, Spring 2016, <https://github.com/debanshib/comic-book>

- Developed a mobile application that allows users to create comic books with their friends in real-time, using camera photos
- Developed application with MEAN stack, Ionic, Canvas, and Firebase
- Responsible for full-stack functionality of image filtering, canvassing and real-time feed through Firebase configuration

WakeMe, *Sole Developer*, Spring 2015, <https://github.com/debanshib/wakeMe>

- Created an alarm clock that allows users to share customized wakeup messages and songs with friends
- Developed application using MEAN stack, ResponsiveVoice.JS and Spotify API
- Won Fullstack Academy Sigurdsson Award for Best Design and UX

Trekly, *Developer*, Spring 2016, <https://github.com/debanshib/trekly>

- Built an e-commerce website with multi-tenancy, using MEAN stack and Stripe API
- Responsible for full-stack functionality of the shopping cart and multi-tenancy feature

Running Tracker - UCLA Wireless Health, *Engineer*, Spring 2016

- Developed an Android application with ankle sensors and Bluetooth integration to assess running performance and technique
- Programmed algorithms to process large data sets and calculate the runner's cadence and ground contact time in real-time

WORK EXPERIENCE

Accenture Technology Labs, San Francisco

Open Innovation Associate Manager, Mar 2015 – Feb 2016

Open Innovation Senior Analyst, Feb 2014 – Feb 2015

- Evaluated 200+ startups to establish new partners and incorporate emerging technology into Accenture's technology offerings
- Identified specific strategic partnerships that led to new offerings and \$5M+ in revenue in <1 year of GTM
- Worked on Accenture's global Open Innovation strategy, and rolled out innovation programs in 6 countries
- Drove end-to-end design, and managed development of an internal collaboration platform for the Open Innovation initiative in 40+ countries with 1200+ active users
- Contributed to research and writing of [publication](#): "Bridgemakers: Guiding Enterprise Disruption through Open Innovation"

Accenture Consulting, San Francisco

Project 2: Data Analyst, Aug 2012 – Feb 2014

- Developed data models for new APIs to be used in all applications across sales, marketing, channels, and support functions, and provide a unified view of the customer for large market cap (\$100B+) telecom client

Project 1: Technology Architecture Analyst, Aug 2012 – Aug 2013

- Collaborated with client leadership across all customer-facing divisions to create an integrated technology architecture strategy
- Worked with client teams to design transformational CRM program budgeted at \$65M which entailed defining requirements, designing architecture solutions, and estimating effort for 32 new business initiatives

EDUCATION

University of California, Los Angeles (UCLA), Spring 2012

- B.S. Electrical Engineering
- Alpha Lam Lambda Delta and Phi Eta Sigma National Honors Societies

LEADERSHIP

BUILD – Entrepreneurship program for low-income HS students, Bay Area, May 2014 – Present

Volunteer Mentor and Accenture Bay Area Ambassador

- Guide underprivileged HS students through each stage of entrepreneurship as they transform a product idea into a business
- As Accenture ambassador, increased Accenture's involvement as mentors, sponsors, and hosts of BUILD events
